million HIV-infected people who caught the virus through reused needies in hospitals and similer hygiene lapses;

(b)if so, Government's reaction thereto;

(c) whether it is a fact that feuily Wood-testing kits for HIV and Hepatitis may have been fradulently sold to Government clinics across the country, possibly resulting in people receiving transfusions of infected blood; and

(d) if so, the details of action taken or proposed to be taken in this regard?

THE MINISTER OF STATE IN THE MINISTRY OF HEALTH AMD FAMILY WELFARE (SHRIMATI PANABAKA LAKSHMl): (a) and (b) India had an estimated 5.2 million HIV infected people by the end of 2005. The probable mode of transmission among the reported number of AIDS cases has been observed to be sexual mode of transmission in 05.7%, transmission from mother to child-4.3%, blood and blood products as 1.9% and Injecting drug users as 1.8%. In 6% of tha cases the meda of transmission could not be determined. There is no compelling evidence that unsafe injections are a predominant mods of HIV transmission, axcept in injection drug usars. Clinical history and spidemiological evidence indicate that sexual transmission is the major mode of transmission.

(c) and (d) Yes, Sir. Reports were received regarding supply of - substandard testing ki s for Hapatitis-B and C, which were supplied to blood banks in the State of West Bengal, by a Hyderabad based company called M/S Monozyms India Ltd.. However, there are no reported cases of possibiliy resulting in people receiving transfussions of infected blood.

In view of the complaint received from West Bengal State AIDS Control Society, all State AIDS Control Societies have been directed to suspend proposals if any, to procure from Monoyzme India Ltd and to strictly follow guidelines and procedures laid down. Further, the Drugs Controller General (India) has been asked to investigate into the matter and take appropriate action under rules.

Upgrading of Virology Institute, Alapuzha

356. SHRI K. CHANDRAN PILLAI: Will the Minister of HEALTH AND FAMILY WELFARE be pleased to state:

(a) whether Government are aware of the fact that during the recent

outbreak of dciiguc/Chikungunya in Karris, bleed s?ir»ipl5s of patisnls had to be s-snt to Punt/Delui for diagnosis;

(b) whether this process caused inordinate <*l&k.y* in identification of the decease 2nd providing proper medication to the patients;

(c) whether Govemment would consider upgrading the facilities at tha Alpuzha Virology Institute; and

(d) if so, the details thereof and if not, the reasons therefor?

THE MINISTER OF" STATE IN THE MINISTRY OF HEALTH AND FAMILY WELFARE (SHRIMATI PANABAKA LAKSHMI): (a) and (b) Chikangunya and Dengue fever which are viral infections dtegncsed clinically supported by lab investigations. Supportive treatment of the paiisnls can be initiated even without confirmatory diagnosis by laboratory investigation.

(c) and (d) The Government of india has identified the Virology Institute Alapuzha-as one of the institutions in the country fcr strengthening diagnostic facilities for dengue, Chikungunya, Japanese Encephalitis and other viral vector borne disease. The National Institute of Virology, Pune has been asked to supply tha tasting kits as well as train the team from Virology Institute Aapuxha. Further, under Integrated Disease Surveillance Programme, ali th3 district level laboratories and state referral laboratories are being strengthened and networked in a phased manner.
